

Available to Ship

For Sage Pro ERP 7.x, ACCPAC Pro 6.x and SBT Pro 5.0
From Lefkowitz Systems, Inc.

What is *Available To Ship*?

Available to Ship is an enhancement for Sage Pro Order Entry that prints sales orders or picking tickets for all sales orders that ***can*** and ***should*** be shipped. Orders that ***can*** be shipped are those for which there is sufficient stock on hand ranked in a first-in, first-out basis. Orders that ***should*** be shipped are those that are scheduled to be shipped based on the order required date and those where the available value of the sales order exceeds a user-defined minimum.

What are the benefits of using *Available to Ship*?

Available to Ship takes the guesswork out of picking orders. ***Available to Ship*** prints only those orders that, given current conditions, ***can*** and ***should*** be shipped. Rational shipping leads to faster inventory turns, happier customers, more efficient warehouse operations and greater profits.

Who needs *Available to Ship*?

Importers, wholesalers and distributors who stock many items in their inventory and receive new inventory frequently.

How does *Available to Ship* work?

Available to Ship asks the user for a minimum dollar value and a ship-through date. Then it sorts and ranks open sales orders based on stock on hand, order requirement dates and shippable value. Finally, it prints a batch of sales orders or picking tickets for only the orders that can and should be shipped based on these criteria.

Do I need an Sage Pro source code license to use *Available to Ship*?

No. There is no need for an Sage source code license. ***Available to Ship*** runs from the Sage Pro Custom menu.

Will I need to reorder *Available to Ship* when Sage releases a new build of Pro?

Most likely, no, unless Sage makes a radical change to the way sales orders or picking tickets are structured or printed.

PICKING TICKET

Bill To:
 Atlantic Edison
 440 Electric Avenue
 Claremont, NH 14086
 U.S.A.

Ship To:
 Atlantic Edison
 4255 Avenida Electrica
 Suite # 114
 San Rafael, CA 94903
 U.S.A.

This is the *Available to Ship* Picking Ticket. The difference between it and Sage's is the new "Avail Qty" field. This tells you exactly how many of each item you should pick for this order.

Customer	Salesprsn	Purchase Order #	Ship Via	F.O.B.	Our Order #
AED1	HQ	None	FedEx	Origin	None

Line	Item Description	Req Date	Location	U/M	Open Qty Avail Qty	Qty Picked
1	TEST_ITEM1 Test Item 1	10/12/99	WH1	EA	5	1
**** Insufficient Quantity on Hand for Shipment in full ****						
Serial Number(s)						

10	TEST_ITEM10 Test Item 10	10/12/99	WH1	EA	2	1
**** Insufficient Quantity on Hand for Shipment in full ****						
Serial Number(s)						

2	TEST_ITEM2 Test Item 2	10/12/99	WH1	EA	10	1
**** Insufficient Quantity on Hand for Shipment in full ****						
Serial Number(s)						

Orders are always shipped correctly. *Available to Ship* takes the guesswork out of picking orders.
